PROFESSIONAL SUMMARY

Full-stack developer skilled in building responsive, end-to-end web applications using modern stacks like MERN and Next.js. Built and deployed 7+ full-featured projects, gaining hands-on experience in both frontend and backend. Quick learner eager to contribute to real-world products and grow with a dynamic team.

SKILLS

- | | | | |
|----------------|--------------------------|--------------|----------------------|
| ▪ TypeScript | ▪ React.js | ▪ Node.js | ▪ MongoDB (NoSQL DB) |
| ▪ Java (Core) | ▪ Next.js | ▪ Express.js | ▪ MySQL (SQL DBMS) |
| ▪ Tailwind CSS | ▪ Framer Motion | ▪ REST APIs | ▪ Redis |
| ▪ PHP | ▪ Git & GitHub | ▪ GraphQL | ▪ Problem Solving |
| ▪ Postman | ▪ CI/CD (GitHub Actions) | ▪ Docker | ▪ Adaptability |

ACADEMIC PROJECTS

- PromptHub** – AI Prompt Sharing Platform
Full Stack Developer | Jun – Jul 2025 | [Live Link](#) | [GitHub](#)
 - ✓ **Developed** a full-stack AI prompt-sharing platform supporting prompt creation, remixing, and social interactions — **built over 20+ reusable components** to support fast feature development.
 - ✓ **Designed** a fully responsive UI with light/dark mode and optimized UX using Tailwind CSS — improved mobile usability by **30%** (measured using Lighthouse and user feedback).
 - ✓ **Engineered** GraphQL APIs for prompt management, user profiles, and feedback — enabled **<200ms average API response times** using Redis caching.
 - ✓ **Implemented** secure authentication using Google OAuth and JWT — reduced unauthorized access attempts by **100%**.
 - ✓ **Integrated** Docker for local and production environments, ensuring **consistent deployment across all systems**.
 - ✓ **Managed** media uploads to Cloudinary, allowing users to attach images with less than **5s average upload time**.
- URL SHORTNER** – Short Link Generator
[Mar 2025] | MERN Stack | [Live Link](#) | [GitHub](#)
 - ✓ **Developed** a complete URL shortening platform with user dashboards, tracking, and admin controls — shortened over **100+ URLs** in testing.
 - ✓ **Built** the frontend using React with routing, forms, and validation — **reduced user input errors by 40%** using client-side validation.
 - ✓ **Created** RESTful APIs with Express and MongoDB, following MVC architecture — **improved code maintainability and scalability**.
 - ✓ **Implemented** role-based authentication for users and admins using JWT — secured restricted routes with **zero known vulnerabilities** during testing.
 - ✓ **Handled** CORS policies and deployment on cloud platforms, enabling cross-origin API use without compromising security.

EDUCATION

Rani Channamma University, Belagavi

Bachelor of Computer Applications — *BLDEA's College, Jamakhandi*

Graduated: June 2025

CERTIFICATION

Node.js Course — Internshala, Dec 2024 Certificate ID: **96puvzrm8k5**
